Project Name	Rising Waters
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • We need accurate flood alerts 4 to 6 processing hours in advance risk • Manual tracking is too slow during evaluation we heavy monsoon seasons	THINKS • Is delayed manual data putting local families at • If we automate storm can save hundreds of
DOES • Checks Multiple delayed Weather feeds Simultaneously during heavy downpours • Issues public Warnings via sirens and updates active rescue teams • Coordinates emergency responses	FEELS • Overwhelmed by high responsibility For emergency public safety • Stressed due to lack of automated predictive Warning Utility • Frustrated when delayed metrics lead to avoidable urban property
