Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	· Environment Sensors / River Gauges · Disaster Management Officer · Citizens / Public
Rectangle with numbered header	Process	· Data Ingestion & Validation: · Flood Prediction Modeling. · Alert Generation & Dispatch
Rectangle (solid fill, no number)	Data Store	· Historical Weather Database · Live Sensor Logs · Emergency Alert History
Labeled arrow	Data Flow	· Sensors → 1 Process: raw sensor data · Process → Live Sensor Logs: validated metrics · Live Sensor Logs → 2 Process: current water levels · Process → Disaster Officer: flood risk charts · Process → 3 Process: trigger alert signal · Process → Citizens: emergency evacuation warnings

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
