

Demonstration of Proposed Features

Date	30 June 2026
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S. No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Historical Weather Data Processing	Collects and preprocesses rainfall, cloud visibility and seasonal weather data for model training.	Implemented	Yes	Data cleaned and validated successfully.
2	Machine Learning Model Training	Trains Decision Tree, Random Forest, KNN and XGBoost models for flood prediction.	Implemented	Yes	Multiple models compared.
3	Best Model Selection	Selects the highest accuracy model automatically based on evaluation metrics.	Implemented	Yes	XGBoost selected with 96.55% accuracy.
4	Flood Risk Prediction	Predicts whether flood risk is High/Low using current weather inputs.	Implemented	Yes	Real-time prediction available.
5	Flask Web Application	User-friendly interface for entering weather data and viewing predictions.	Implemented	Yes	Successfully integrated with ML model.
6	IBM Cloud Deployment Support	Application designed for scalable deployment on IBM Cloud.	Implemented	Yes	Ready for cloud deployment.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
