

Project Demo Planning

Date	30 June 2026
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the problem statement, objectives, and importance of the Rising Waters flood prediction system.	2	Gandham Ramcharan
2	Dataset & Machine Learning Models	Explain the historical weather dataset, input features (annual rainfall, cloud visibility, seasonal rainfall), and the models used: Decision Tree, Random Forest, KNN, and XGBoost.	3	Gandham Ramcharan
3	Model Performance	Present model comparison and explain why XGBoost was selected with 96.55% accuracy.	2	Gorijala Harika Gayathri
4	Flask Web Application Demo	Demonstrate entering weather parameters and show real-time flood prediction through the web interface.	4	Gorijala Harika Gayathri
5	Real-World Scenarios	Demonstrate Early Flood Warning & Evacuation Planning and Disaster Response & Resource Allocation scenarios.	3	Swathi Sai Uma Lakshmi Mamidala
6	Conclusion & Future Scope	Summarize project outcomes, IBM Cloud deployment, future improvements, and answer questions.	1	Swathi Sai Uma Lakshmi Mamidala

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the impact of floods, project objectives, and the need for an AI-based early flood prediction system.
2	Solution Overview	Describe the historical weather dataset, input features, machine learning models (Decision Tree, Random Forest, KNN, XGBoost), and why XGBoost (96.55% accuracy) was selected.
3	Live Feature Demonstration	Demonstrate the Flask web application by entering rainfall and cloud visibility data to predict flood risk and explain the real-world use cases for evacuation

		planning and disaster response.
4	Q&A Session	Answer questions, discuss IBM Cloud deployment, future enhancements, and conclude the presentation.
