Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	• User
Rectangle with numbered header	Process	• Flood Prediction System (Flask Web Application) • Data Preprocessing • Prediction Result Generation
Rectangle (solid fill, no number)	Data Store	• Machine Learning Model (flood_model.pkl)
Labeled arrow	Data Flow	• External Entity: User • Process 1: Flood Prediction System (Flask Application) • Process 2: Data Preprocessing • Data Store: Machine Learning Model (flood_model.pkl) • Output: Flood / No Flood Prediction

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
